BUILD ROOM OS
AI MOMENTUM LABS

What's new in Build Room OS

Changes since last week's guide (October 21, 2026), plus step-by-step help to get started.

- **Two new tools:** the Search & Answer Engine and the Proof Engine
- **Get found on Google** and in AI answers, without ads
- **New to Build Room OS?** Simple install steps start on page 6
- **Every command** that starts a tool, on the last four pages

SINCE LAST WEEK

What's new, in plain words

1. The Search & Answer Engine NEW

Get found in Google, Google Maps, YouTube and AI answers (Google's AI, ChatGPT, Perplexity) **without ads**. It fixes your Google Business Profile first, helps you write one honest answer page a week on your own site, keeps reviews coming, lists you in the free directories, and checks monthly whether the AI tools name you.

2. The Proof Engine NEW

Turns a client's good result into proof you're **allowed** to use: a short interview and a permission ask you send yourself, every story kept with its permission, one story at a time placed into your page, emails, ads and posts.

3. Pages go live and get indexed for you

On WordPress, Webflow, Shopify and Wix it can publish the page itself. On Squarespace, Kajabi, GoHighLevel and Google Sites it gives you a ten-minute paste checklist. Then it tells Bing, checks the page is live, and shows you the one click Google asks for.

4. Your printed guide grew again

Say These Words (the PDF in your folder) now has **six pages**.

GOOD TO KNOW

Your **Business File** gained a section for your search presence (§21). You don't have to do anything; the tool fills it in. Thirty-two tools now.

TRY THE NEW THINGS FIRST

Try the Search & Answer Engine

Already have Build Room OS? First get this week's version (page 5). Then:

1. **Open Claude** in your Build Room OS folder, the way you normally do.
2. **See a short demo first.** Type: **Show me how the search engine works**. Nothing is changed; it's a tour.
3. **Start for real.** Type: **Get found on Google**
4. **Fix your Google Business Profile.** It scores it and names what moves your ranking (real name, category, hours, reviews) before what helps a buyer choose you (photos, posts).
5. **Write one page a week.** It picks the question customers ask most, drafts the page in your words, and checks it before it goes live.
6. **Ask every client for a review, the same way.** It gives you the words. Never a gift, never only the happy ones.
7. **Each week:** **Search week** (about three hours). **Each month:** **Am I showing up in ChatGPT?**

HONEST EXPECTATIONS

Profile and reviews move first, within a month or two. Pages take months. It counts calls and bookings, not "traffic".

TRY THE NEW THINGS FIRST

Try the Proof Engine

Best the moment a client tells you something went well. Ten minutes a week keeps it going.

1. **Open Claude** in your Build Room OS folder.
2. **Type:** `Capture this win` and tell it what happened, in the client's words if you remember them.
3. **Send the interview and the permission ask yourself.** It drafts five short questions and asks the client where their words may be used (website, emails, LinkedIn, ads, video) and whether to use their name. You send it by email or text; the tool never contacts your clients.
4. **Wait for the answer.** A story stays unused until the client says yes. A no is respected forever.
5. **Place it.** Say `What proof can I use for my offer page?` and it puts the right story in the right place, with "what a typical client gets" beside the number.
6. **Once a week, say:** `Proof check`. New wins, answers that came in, anything due a nudge.

WHY IT MATTERS

Real, permitted proof is the biggest single upgrade to every page, email and ad you have. And the rules on reviews and testimonials now carry real penalties, so the permission is worth the ten minutes.

ALREADY INSTALLED?

Get this week's version

You'll download the new folder, then move **your** Business File into it so nothing you've built is lost.

1. **Download** `BuildRoom_OS_2026-10-28.zip` from the Members' area. It goes into your **Downloads** folder.
2. **Unzip it. Mac:** double-click the file. **Windows:** right-click it and choose **Extract All**, then **Extract**.
3. **Find your old Build Room OS folder** (the one you've been using).
4. **Copy your Business File** out of the old folder. It's called `BUILDROOM_BUSINESS_FILE.md`. Right-click it and choose **Copy**.
5. **Open the new folder** and choose **Paste**. When it asks, choose **Replace**. (The new folder comes with a blank one; yours replaces it.)
6. **From now on, use the new folder.** Keep the old one for a week, just in case, then you can delete it.

NOT SURE WHICH FOLDER IS YOURS?
Open your old Business File in a text app. If you see your business name and your answers, that's the one to copy.

NEW TO BUILD ROOM OS?

If you haven't installed it yet

What you need (once)

1. **A computer**: Mac or Windows. A phone or tablet won't work for this part.
2. **A paid Claude plan** (Pro or Max) from **claude.ai**. This is what does the thinking.
3. **Claude Code** on your computer. If you don't have it yet, open the setup page at **code.claude.com/docs/en/setup** and follow the steps for your computer, or ask in the Members' area; we'll walk you through it on a call.
4. **The Build Room OS file**: `BuildRoom_OS_2026-10-28.zip` from the Members' area.

Put the folder somewhere safe

1. **Unzip the download. Mac:** double-click it. **Windows:** right-click, **Extract All**, then **Extract**.
2. **Move the folder** called `BuildRoom_OS` into your **Documents** folder. This is your Build Room home; your Business File lives here.

KEEP IT OFF CLOUD-SYNC FOLDERS

Use Documents on your own computer, not OneDrive or iCloud Drive "optimised" storage, so Claude can always read your files.

NEW TO BUILD ROOM OS?

Open it and say your first words

On a Mac

1. Press `⌘ Command` + `Space`, type **Terminal**, press Enter.
2. Type `cd` and one space. Don't press Enter yet.
3. Drag the `BuildRoom_OS` folder from Documents into the Terminal window. Press Enter.
4. Type `claude` and press Enter.

On Windows

1. Open the `BuildRoom_OS` folder in Documents.
2. Click once in the address bar at the top (where the folder path shows).
3. Type **powershell** and press Enter. A blue or black window opens.
4. Type `claude` and press Enter.

Your first words

When Claude is ready, type this and press Enter:

I'm new to the Build Room. Set me up.

It asks one question at a time. No wrong answers; stop and come back any time.

THREE HABITS

1. Always open Claude **inside** your `BuildRoom_OS` folder.
2. Unsure? Say **Where do I start?**
3. Never paste passwords or account keys into the chat.

KEEP THIS BY YOUR COMPUTER

Every command (1 of 4)

Type any of these into Claude, inside your Build Room OS folder, to start that tool.

SAY THIS	WHAT IT DOES
START HERE	
I'm new to the Build Room. Set me up.	A tour and your first step
Where do I start?	Shows your progress and the one thing to do next
NEW THIS WEEK	
Get found on Google NEW	Found on Google and in AI answers, without ads
Fix my Google Business Profile	Scores your profile; what to fix first
Get more Google reviews	The ask in your words, for every client
Search week	Your weekly routine, about three hours
Am I showing up in ChatGPT?	The monthly check of the AI answers
Capture this win NEW	A client result turned into proof you may use
YOUR FOUNDATION (IN THIS ORDER)	
Help me build my ideal client avatar	Who you serve, and their own words
Help me build my signature offer	What you sell, the price, the guarantee
Help me position my business	Why people should choose you
Write my offer page	A finished sales page

KEEP THIS BY YOUR COMPUTER

Every command (2 of 4)

SAY THIS	WHAT IT DOES
GETTING CLIENTS	
Help me map my funnel	How strangers become clients, step by step
Help me build my opt-in page	A sign-up page and free gift
Build my follow-up system	Emails that follow up for you
Help me get more leads	Your network, outreach, referrals
Help me with my sales call	A sales script, plus practice
Where is my funnel leaking?	Where people drop off, and the fixes
Build my LinkedIn engine	Profile, posts and a daily routine for LinkedIn clients
Who should I message on LinkedIn today?	Today's short list, with draft messages
Plan my LinkedIn week	Three posts and last week's results
Plan my launch	Plan a live event that sells
Is my launch ready?	The checklist before you invite anyone
How did my launch do?	Results and lessons for next time

KEEP THIS BY YOUR COMPUTER

Every command (3 of 4)

SAY THIS	WHAT IT DOES
MARKETING AND WORDS	
Make me ads	Ad ideas and finished ads using your real photo
Make me a video	A video plan, script and edit around you
Write me the email	Any email, page or letter, in your voice
Find the words my clients actually use	Real customer language, with sources
Make my offer a no-brainer	Bonuses, guarantee, the offer math
Run discovery on this business	Research on your business, a client or a prospect
RUNNING THE BUSINESS	
Help me document my processes	Step-by-step instructions anyone can follow
Help me hire someone	Job ad, interview questions, first week
Help me train my new hire	A training plan with checklists
What numbers should I be watching every week?	A one-page weekly dashboard

KEEP THIS BY YOUR COMPUTER

Every command (4 of 4)

SAY THIS	WHAT IT DOES
ANYTIME	
Let's brainstorm	A brainstorm that ends in a decision
Capture what we decided	Turns notes into a dated plan
Build my compass	Your values and strengths, in your words
Convene the board	Four advisers argue your decision
EXTRAS (WHEN YOU'RE READY)	
Set up my second brain	An Obsidian notes vault Claude reads
Build me a source watcher	Saves the best of podcasts and videos to your notes
Make me an agent	Designs a helper that runs a task for you

STUCK?

Say **Where do I start?** or bring your question to the next Build Room session. Everyone gets stuck at the start; it gets easy quickly.
