

What's new in Build Room OS

Changes since last week's session (October 14, 2026), plus step-by-step help to get started.

- **Two new tools:** the LinkedIn Engine and the Event Launcher
- **Easier to start:** every tool now responds more reliably to the words you say
- **New to Build Room OS?** Simple install steps start on page 5
- **Every command** that starts a tool, on the last three pages

SINCE LAST WEEK

What's new, in plain words

1. The LinkedIn Engine NEW

Get clients from LinkedIn **without ads and without anything automated**. It rewrites your profile so it works like a sales page, writes three posts a week from *your* stories, and gives you a short daily list of people worth talking to. You do the posting and messaging yourself, about 20 minutes a day.

2. The Event Launcher NEW

Run a live event that sells: a 3-day bootcamp, a 5-day challenge, a workshop or a webinar. It works out how many people you need to invite, writes your emails one at a time, builds the calendar reminders, plans each day, and helps you close. Before anything goes out, it walks you through a checklist so your payment link and follow-up actually work.

3. Everything starts more easily

All 30 tools now respond more reliably when you say their starting words. If one doesn't start, say **Where do I start?** and it will point you to the right one.

4. Your printed guide grew

Say These Words (the PDF in your Build Room OS folder) now has five pages, including a page for each new tool. Print the new pages and keep them by your computer.

GOOD TO KNOW

Your **Business File**, the one document that remembers your business, gained a new section for your launches and events. You don't have to do anything; the tools fill it in for you.

TRY THE NEW THINGS FIRST

Try the LinkedIn Engine

Already have Build Room OS? First get this week's version (the steps for that are on page 5). Then:

1. **Open Claude** in your Build Room OS folder, the way you normally do.
2. **See a short demo first.** Type: **Show me how the LinkedIn engine works** and press Enter. Nothing is changed; it's just a tour.
3. **Start for real.** Type: **Build my LinkedIn engine**
4. **Answer one question at a time.** It may ask you to paste your current LinkedIn headline and "About" section. Have LinkedIn open in your web browser.
5. **Copy each piece into LinkedIn yourself.** It never logs in to LinkedIn and never posts for you. That keeps your account safe.
6. **Each morning, ask:** **Who should I message on LinkedIn today?**
7. **Once a week, ask:** **Plan my LinkedIn week**

TIP

Your stories are what make the posts good. When it asks about a client or a lesson, tell it out loud with your phone's voice typing, or type a few honest sentences. It never makes up stories or results.

TRY THE NEW THINGS FIRST

Try the Event Launcher

Best once you know what you'd sell at the end of the event (your offer). If you don't have one yet, say **Help me build my signature offer** first.

1. **Open Claude** in your Build Room OS folder.
2. **See a short demo first.** Type: **Show me how the event launcher works**
3. **Start planning.** Type: **Plan my launch**. It asks your goal, your list size and your dates.
4. **Check the numbers.** It tells you honestly whether your list can reach your goal.
5. **Approve each email one at a time.** Change anything that doesn't sound like you.
6. **Before you invite anyone, ask: Is my launch ready?** A short checklist, one item at a time: does the payment link work on your phone, are the reminders on and timed right.
7. **After your event, ask: How did my launch do?** You'll get the three biggest lessons for next time.

PLAN AHEAD

Give yourself at least **3 to 4 weeks** from "Plan my launch" to your event day, and 8 weeks or more if partners will promote it for you.

ALREADY INSTALLED?

Get this week's version

You'll download the new folder, then move **your** Business File into it so nothing you've built is lost.

1. **Download** `BuildRoom_OS_2026-10-17.zip` from the Members' area. It goes into your **Downloads** folder.
2. **Unzip it. Mac:** double-click the file. **Windows:** right-click it and choose **Extract All**, then **Extract**.
3. **Find your old Build Room OS folder** (the one you've been using).
4. **Copy your Business File** out of the old folder. It's called `BUILDROOM_BUSINESS_FILE.md`. Right-click it and choose **Copy**.
5. **Open the new folder** and choose **Paste**. When it asks, choose **Replace**. (The new folder comes with a blank one; yours replaces it.)
6. **From now on, use the new folder.** Keep the old one for a week, just in case, then you can delete it.

NOT SURE WHICH FOLDER IS YOURS?

Open your old Business File in a text app. If you see your business name and your answers, that's the one to copy.

NEW TO BUILD ROOM OS?

If you haven't installed it yet

What you need (once)

1. **A computer**: Mac or Windows. A phone or tablet won't work for this part.
2. **A paid Claude plan** (Pro or Max) from **claude.ai**. This is what does the thinking.
3. **Claude Code** on your computer. If you don't have it yet, open the setup page at **code.claude.com/docs/en/setup** and follow the steps for your computer, or ask in the Members' area; we'll walk you through it on a call.
4. **The Build Room OS file**: `BuildRoom_OS_2026-10-17.zip` from the Members' area.

Put the folder somewhere safe

1. **Unzip the download. Mac:** double-click it. **Windows:** right-click, **Extract All**, then **Extract**.
2. **Move the folder** called `BuildRoom_OS` into your **Documents** folder. This is your Build Room home; your Business File lives here.

KEEP IT OFF CLOUD-SYNC FOLDERS

Use Documents on your own computer, not OneDrive or iCloud Drive "optimised" storage, so Claude can always read your files.

NEW TO BUILD ROOM OS?

Open it and say your first words

On a Mac

1. Press `⌘ Command` + `Space`, type **Terminal**, press Enter.
2. Type `cd` and one space. Don't press Enter yet.
3. Drag the `BuildRoom_OS` folder from Documents into the Terminal window. Press Enter.
4. Type `claude` and press Enter.

On Windows

1. Open the `BuildRoom_OS` folder in Documents.
2. Click once in the address bar at the top (where the folder path shows).
3. Type **powershell** and press Enter. A blue or black window opens.
4. Type `claude` and press Enter.

Your first words

When Claude is ready, type this and press Enter:

I'm new to the Build Room. Set me up.

It asks one question at a time. No wrong answers; stop and come back any time.

THREE HABITS

1. Always open Claude **inside** your `BuildRoom_OS` folder.
2. Unsure? Say **Where do I start?**
3. Never paste passwords or account keys into the chat.

KEEP THIS BY YOUR COMPUTER

Every command (1 of 3)

Type any of these into Claude, inside your Build Room OS folder, to start that tool.

SAY THIS	WHAT IT DOES
START HERE	
I'm new to the Build Room. Set me up.	A tour and your first step
Where do I start?	Shows your progress and the one thing to do next
NEW THIS WEEK	
Build my LinkedIn engine NEW	Profile, posts and a daily routine for LinkedIn clients
Who should I message on LinkedIn today?	Today's short list, with draft messages
Plan my LinkedIn week	Three posts and last week's results
How is my LinkedIn doing?	Your weekly LinkedIn scorecard
Plan my launch NEW	Plan a live event that sells
Is my launch ready?	The checklist before you invite anyone
How did my launch do?	Results and lessons for next time
YOUR FOUNDATION (IN THIS ORDER)	
Help me build my ideal client avatar	Who you serve, and their own words
Help me build my signature offer	What you sell, the price, the guarantee
Help me position my business	Why people should choose you
Write my offer page	A finished sales page

KEEP THIS BY YOUR COMPUTER

Every command (2 of 3)

SAY THIS	WHAT IT DOES
GETTING CLIENTS	
Help me map my funnel	How strangers become clients, step by step
Help me build my opt-in page	A sign-up page and free gift
Build my follow-up system	Emails that follow up for you
Help me get more leads	Your network, outreach, referrals
Help me with my sales call	A sales script, plus practice
Where is my funnel leaking?	Where people drop off, and the fixes
MARKETING AND WORDS	
Make me ads	Ad ideas and finished ads using your real photo
Make me a video	A video plan, script and edit around you
Write me the email	Any email, page or letter, in your voice
Find the words my clients actually use	Real customer language, with sources
Make my offer a no-brainer	Bonuses, guarantee, the offer math
Run discovery on this business	Research on your business, a client or a prospect

KEEP THIS BY YOUR COMPUTER

Every command (3 of 3)

SAY THIS	WHAT IT DOES
RUNNING THE BUSINESS	
Help me document my processes	Step-by-step instructions anyone can follow
Help me hire someone	Job ad, interview questions, first week
Help me train my new hire	A training plan with checklists
What numbers should I be watching every week?	A one-page weekly dashboard
ANYTIME	
Let's brainstorm	A brainstorm that ends in a decision
Capture what we decided	Turns notes into a dated plan
Build my compass	Your values and strengths, in your words
Convene the board	Four advisers argue your decision
EXTRAS (WHEN YOU'RE READY)	
Set up my second brain	An Obsidian notes vault Claude reads
Build me a source watcher	Saves the best of podcasts and videos to your notes
Make me an agent	Designs a helper that runs a task for you

STUCK?

Say **Where do I start?** or bring your question to the next Build Room session. Everyone gets stuck at the start; it gets easy quickly.
